

From Bottle To Body

Clinical Trial Service

We are with you from the start to the end

Drug development is a long process in which time is one of the most important factors and it is challenging to know where and who to ask for required information. With our extensive product portfolio we enable you to conduct safe and effective clinical studies. B. Braun B2B provides you with all necessary knowledges to meet national and international regulations. In addition, we have proven expertise in product licensing and registration. Your challenges are our challenges, you are accompanied by our local and international resources.

Your challenge: Drug development

You are looking for

- Application devices
- Off-the-shelf products
- Supply safety
- Material stability
- Product documentation

We offer

- Full range of route administrations therapy products (intravenous, subcutaneous, infusion, oral, intrathecal, parenteral, etc.)
- Extensive experience in drug-device combination, procedure packs, off-the-shelf products and customized devices
- Global footprint (market accessibility and registration)
- Adherence to international regulations
- Third-party sourcing

Your challenge: Launch preparation and market launch

You are looking for

- Treatment development
- Application devices
- Production capacity
- Marketing support
- Product registration
- Safe and exact drug delivery
- User friendly application
- Continuous support

We offer

- Customized medical devices
- Contract manufacturing
- Private labeling
- Drug application kits (see below)
- Regulatory Affairs and Quality Management support
- Dedicated project management team

Drug Application Kits

- | | | |
|----------|---|---|
| 1 | Drug description & name of the kit | Enter the description of the drug for which you want to configure a kit as well as the name for the kit. |
| 2 | Medical devices | Select the components of your kit – from high-quality products for drug administration through infusion devices and venipuncture products up to wound care dressings. |
| 3 | Box sizes | Determine the packaging for your kit. Choose one of our standard boxes or a customized packaging that is designed according to your specific needs. |
| 4 | Target markets, quantities, etc. | State in which country the kit is to be marketed, what quantities you need, and which requirements are to be placed on the label. |

→ **Technical documentation**

Related to your request, we provide you with corresponding documents and check registration issues.

→ **Third-party sourcing**

We organize and manage supply of your desired products from third-party suppliers.
